

FOR IMMEDIATE RELEASE

bioMérieux and Bionique Testing Laboratories Announce Collaboration to Enhance Mycoplasma Testing Solutions

Saranac Lake, NY – September 16, 2024—Bionique Testing Laboratories LLC, a global provider of mycoplasma testing services and bioMérieux, a world leader in the field of *in vitro* diagnostics, announced today that they are joining forces to provide bioMérieux’s valued customers direct access to Bionique’s product-specific validation services for the BIOFIRE® FILMARRAY® 2.0 Industry system for mycoplasma detection to facilitate the efficient validation and implementation of the technology, and support the clinical development of biologics including cell & gene therapies.

The new BIOFIRE® Mycoplasma method validation service offering will allow customers to leverage Bionique’s more than 30 years of dedicated experience and comprehensive CMC expertise in this niche analytical testing space. Clients will benefit from a streamlined validation experience that optimizes their internal resources, mitigates any risk of in-lab or facility contamination during validation, ensures CGMP compliance, and meets the global regulatory requirements and expectations.

“The integration of Bionique’s specialized validation services with bioMérieux’s BIOFIRE® Mycoplasma system represents a comprehensive offering to enable the efficient adoption of a novel molecular platform for rapid mycoplasma testing. This collaboration underscores our commitment to providing clients with the highest quality and leading-edge mycoplasma testing solutions to meet their quality, testing and regulatory needs,” states Lori Daane, PhD, Chief Scientific Officer at Bionique Testing Laboratories.
